## 1 Introduction

Our project GREENERY is an e-commerce website in which we provide different categories of plants. In this project we have sufficient amount of products to satisfy our customers. Our project will be helpful to them who are interested in gardening and also farming. The main objective of our project is to make gardening and farming more easier and convenient. As this kind of website is not so much available in our country, people have to go to local market to purchase their desired plants and it also time consuming. Our project will reduce these hassles and it also time saving. It's also helpful in this covid situation.

we will develop our project using visual studio, C Sharp, ASP.NET MVC and SQL Management Studio 2014.

## 2 Project Features

- It has two interfaces, one is Admin and another is Customer.
- Customer can see and choose product and can add them to the Cart.
- Before placing the order customer have to register or login with their username and password.
- Customer can see his profile after login.
- Customer can also give feedback according to our service.
- Customer can know about the project developer from about us page.
- Admin can add new categories and new products in the cart.
- Admin can watch the information of all the tables from admin dashboard.

## 3 Conclusion

On our website called "Greenery", searching plant through our large database and finding plants of different categories can be done easily. Our main purpose is Building a user-friendly website for people who wants to purchase plants even sitting at home. Providing top quality service is the main goal of our plants selling project. Clients can have different categories of plants. We provide flexible and comfortable way of order. So that client does not face any hassles. Client can give their feedback also if they face any issues.

We are planning to develop a website according to our clients' preferences and feedback. We will add some more features in our order process such as admin approval to the order of clients. We will improve contact with clients and the payment system. Our main focus will be create this website more and more client friendly.

## 4 Project Entity-Relationship Diagram

The ERD of our project is given below:
